# GradAutomaton

P. Baillehache

March 18, 2020

## Contents

## Introduction

GradAutomaton is a C library providing structures and functions to manipulate cellular automaton based on Grad structures.

It currently implements the following cellular automaton:

- GradAutomatonWolframOriginal: Cellular automaton described page 53 of "A new kind of science" by S. Wolfram

It uses the `PBErr`, `Grad` libraries.
